

about a million ultra short pulses each second at extremely low power levels. The device samples pulses reflected from distances of up to 20 feet.

This remarkable device, which can be run on a pair of AA batteries for up to 8 years, is inexpensive to construct and has many practical applications. Among those to whom Lawrence Livermore Lab has issued licenses, one licensee plans to use the invention on automobiles to signal if there are vehicles in a driver's blind spot, which promises substantial enhancement of roadway safety. Other possible applications include intrusion alarms, instruments for locating wall studs in wood and rebar in concrete, light switches, liquid level sensors, medical monitors and, safety shutoff valves.

Thomas McEwan's invention is critical to America's technology future. He deserves high praise and credit for his superlative work, and for his reminder that the initiative and creativity that have helped make America the land of economic promise are alive and well. It is a pleasure for me to commend him and thank him for his most important work.

#### COLLEGE PROFESSORS IN CHARGE OF OUR GOVERNMENT?

**HON. JOHN J. DUNCAN, JR.**

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 7, 1995*

Mr. DUNCAN. Mr. Speaker, let me commend to you the following article written by a constituent of mine, Mr. John Mark Hancock. Citing House Speaker NEWT GINGRICH, House majority leader DICK ARMEY, and Senator PHIL GRAMM as examples, this insightful commentary discusses the important role former college and university professors are playing in defining the 104th Congress.

#### COLLEGE PROFESSORS IN CHARGE OF OUR GOVERNMENT

(By John Mark Hancock)

One of the ironic and perhaps overlooked facts about the sweeping Republican victory in last November's elections is that former college professors are actually taking control of our federal government. House Speaker NEWT GINGRICH, House Majority Leader DICK ARMEY, and Senator PHIL GRAMM, a frontrunner for the 1996 GOP Presidential nomination, are all former teachers from various universities.

Since academia has long been the province of self-righteous, bleeding hearts, and the centers of most of our liberal thought, and even Marxist views, on government and social policy, it is especially gratifying to conservatives that these new leaders have come from that realm. It must be galling to the majority of college professors to know that the architects and engineers of the Republican "Contract With America" are from their domain, one they have long sought to preserve as a bastion of liberal ideology.

The ivory towers of America's colleges and universities have for too long now been dominated by leftist views. These professors have promoted such themes as Keynesian economic theory, big government social policies, gay "rights", prisoner's "rights", animal "rights", and studies which glorified Communism, by imparting such ideas to their students in class and in their policies of hiring others of their number, despite a decided trend in the opposite direction on a

worldwide scale, with the breakup of the Soviet Union and the fall of the Berlin Wall.

It is therefore especially satisfying to those of us who have received a great deal of higher education to find that the dream does indeed rise to the top. Our nation's voters have found that the voice of the conservative Christian minority on campuses nationwide is actually the voice of the overall majority of Americans.

As a former member of Young Americans for Freedom and the College Republicans during my student days in the 1970's, it was hard for me to find professors who agreed with what has become the mainstream philosophy of people who are fed up with government's intrusion into their lives. Having served as president of the graduate student body at my school in 1979-81, it was disconcerting to find so many professors wanting to preserve the status quo on campus.

Perhaps this pervasive liberal attitude is to be expected from institutions that thrive on government monies and assistance for their very livelihood. Without huge taxpayer funded mandates, colleges and universities would be unable to help minorities, assist students in paying fees, pay premium salaries to certain professors, achieve research contracts, and perpetuate bloated bureaucracies that are top-heavy with useless administrators.

Cutbacks in government will inevitably mean that our educational institutions will suffer. But, maybe that's not so bad if it weeds out some of the deadwood that some schools have been harboring for too long. The views they hold are the main hindrances and stumbling blocks to us bringing about a better America, one in which government gets out of our lives and pocketbooks, and off of our land.

America was founded as a nation of independent ideas and rugged individualism. It has become a nation dominated by the government that was intended to serve the people, rather than having the people serve its ends. It is long past time for the pendulum to swing back in the other direction.

We have long been a people known for plain speaking and straight talking. The failed policies of FDR's New Deal and LBJ's Great Society programs have finally come home to roost. Their net result is a country that is bankrupt, financially, morally, and spiritually.

Newt Gingrich, Dick ArmeY, and Phil Gramm are shining examples of political leaders who are teaching us all in their academic style, polished in their years as professors, that dependency on government leads to a lack of self-esteem and a country that perpetuates a permanent underclass. They will lead us out of the abyss we have created by deluding ourselves into thinking government is the answer to all of our problems. As Abraham Lincoln once said, "You can't help the poor by weakening the rich." How true.

#### TRIBUTE TO DEDICATION OF ANTHONY R. DEMARCO & GLADYS ALLOWAY DEMARCO MUNICIPAL BUILDING IN WOODLAND TOWNSHIP

**HON. JIM SAXTON**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 7, 1995*

Mr. SAXTON. Mr. Speaker, I rise today to recognize and celebrate the new, beautiful Anthony R. DeMarco and Gladys Alloway DeMarco Municipal Building in Woodland Township, NJ which will be officially dedicated on June 15.

This new facility, Mr. Speaker, is a particularly unique structure designed to reflect the community's cultural traditions and rich history.

The new one story town hall was inspired by the architectural detailing and shingle style of the original saloon building and the surviving historic houses located throughout the town. The building materials reflect those used in the area. Hand split cedar shakes with cedar facias are the predominant materials used on the exterior. Pine end grain flooring with oak wainscot and trip were used extensively on the interiors.

Furthermore, Mr. Speaker, the township has chosen to dedicate the facility as a tribute to Anthony R. DeMarco and Gladys Alloway DeMarco. It is truly a fitting dedication, Mr. Speaker.

Upon Anthony's passing in 1964, a local newspaper published a memorial column. In part, it reads as follows:

Few men thought more of Woodland Township and even fewer had more friends within the Township than Anthony R. DeMarco. Even though he was never a formal resident of Woodland, he passed most of his life in this area, either as a young laborer on cranberry bogs, or, in his mature years, as the owner and operator of a large blueberry and cranberry plantation. He took a keen interest in all aspects of Woodland Township civil and social activities and was an avid student of Burlington County history and of Pine-land lore. As 'Tony' grew older he spent even more time in Woodland Township enjoying the sort of tranquility and peacefulness that can only be found in an area uncorrupted by sprawling residential developments or by industrial complexes.

Gladys Alloway DeMarco was born and raised in the Chatsworth area and was a teacher in the Chatsworth school. Her roots in the region extend back to the days of William Penn.

Finally, Mr. Speaker, there are a number of community leaders who deserve special recognition for assuring that the vision for this important project became a reality.

Woodland's Mayor, John Bowker, chaired the Building Committee that included the Township's two Committeemen, Robert DePetris and Thomas Davis, Township Clerk, Carol Cobb, and J. Garfield DeMarco.

And, Mr. Speaker, the DeMarco Family generously supported the project and provided the assurance that it would be a facility the town will be proud of for generations to come. Very special thanks are due to J. Garfield DeMarco, Mark A. DeMarco, and Anna Lynne DeMarco Papinchak.

#### MEMORIAL DAY IS A TIME TO REMEMBER

**HON. SAM GEJDENSON**

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 7, 1995*

Mr. GEJDENSON. Mr. Speaker, this Memorial Day, as we observe the 50th anniversary of the end of World War II, we have an excellent opportunity to recognize the contributions of more than 28 million living American veterans. Furthermore, it is a good opportunity to improve citizen awareness of the sacrifices
